Summary of Learning from the project (Mapped with Expected Learning Outcomes): (50–100 words):

Through this project, we studied the history of video games in France, from the 1980s to the present day.

We built a responsive bilingual (French/English) website covering Ubisoft, Infogrames, famous French games, an interactive timeline and an image gallery. This helped us improve our French vocabulary and communication, research and content-organising skills, teamwork, creativity and basic web development skills, and gave us a better understanding of French culture and technological development.
